Education

University of Maryland, Baltimore County - GPA: 3.62 / 4.0

Expected Graduation: December 2026

- *Bachelor of Science in Computer Science*
- **Coursework:** Software Engineering, Operating Systems, Data Structures, Computer Security, Algorithms, Malware Analysis, Computer Architecture, Computer Organization and Assembly Language, Principles of Programming Language

Carroll Community College - GPA: 3.83 / 4.0

August 2022 - May 2024

- *Associate of Arts and Sciences*
- PTK Honor's Society Member

Skills

Languages: C++, C, JavaScript, TypeScript, Python, SQL, Bash

Frontend: React, React Native, Qt, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, PostgreSQL, Prisma, SQLite

Cloud & DevOps: Azure, Docker, GitHub Actions, CI/CD, Neon

AI & Auth: Claude API, Clerk, JWT

Embedded & Systems: ESP32, IoT, Sensor I/O, MQTT, BLE, LibreHardwareMonitor

Tools & OS: Git, GitHub, Jira, VSCode, NeoVim, Linux, Windows, macOS

Experience

Software Engineer Intern – Occams Group

[Website Link](#) *May 2026 – Present*

- Sole developer on two simultaneous production systems at a consultancy serving Fortune 100–500 clients
- Built a full ATS platform with AI-powered candidate scoring and resume parsing via Claude API, deployed to Azure with CI/CD via GitHub Actions
- Built a recruiting automation pipeline including a Chrome extension capturing LinkedIn data and contact enrichment via FullEnrich API, automatically enriched 70+ contacts
- Architected PostgreSQL database with Prisma ORM, Azure Blob Storage for resume handling, and Clerk authentication with protected routes
- Presented progress and demoed systems directly to C-suite throughout development; operated with full architectural autonomy

Undergraduate Research Assistant – DAMS Lab (UMBC)

[Website Link](#) *June 2025 – Present*

- Built UMBC Navigator, a privacy-preserving indoor navigation app using Bluetooth beacons, deployed via TestFlight
- Implemented signal processing and device ranging; designed pathfinding algorithm across multiple floors of the TRC building
- Presented at 3 UMBC research days and conducted live demos for faculty and stakeholders
- Developing IoT hardware curriculum for SPACES, a new UMBC course launching 2027

Projects

CorePanel – Real-Time System Monitor

[GitHub Link](#)

- Developed a responsive desktop GUI in C++/Qt to visualize live CPU, GPU, RAM, and Disk metrics
- Architected a C# backend streaming hardware data via LibreHardwareMonitor with real-time chart updates

Smart Home Sensor System – Embedded IoT + Full Stack

[GitHub Link](#)

- Programmed ESP32 firmware to collect environmental data and transmit real-time JSON via serial
- Built a REST API and React Native mobile dashboard; Dockerized for portable deployment

SnapMotive – Hackathon-Winning CV App

[Devpost Link](#)

- Shipped a React Native goal-tracker with computer vision task verification in under 24 hours
- Won Best Computer Vision at HackHounds 2025
